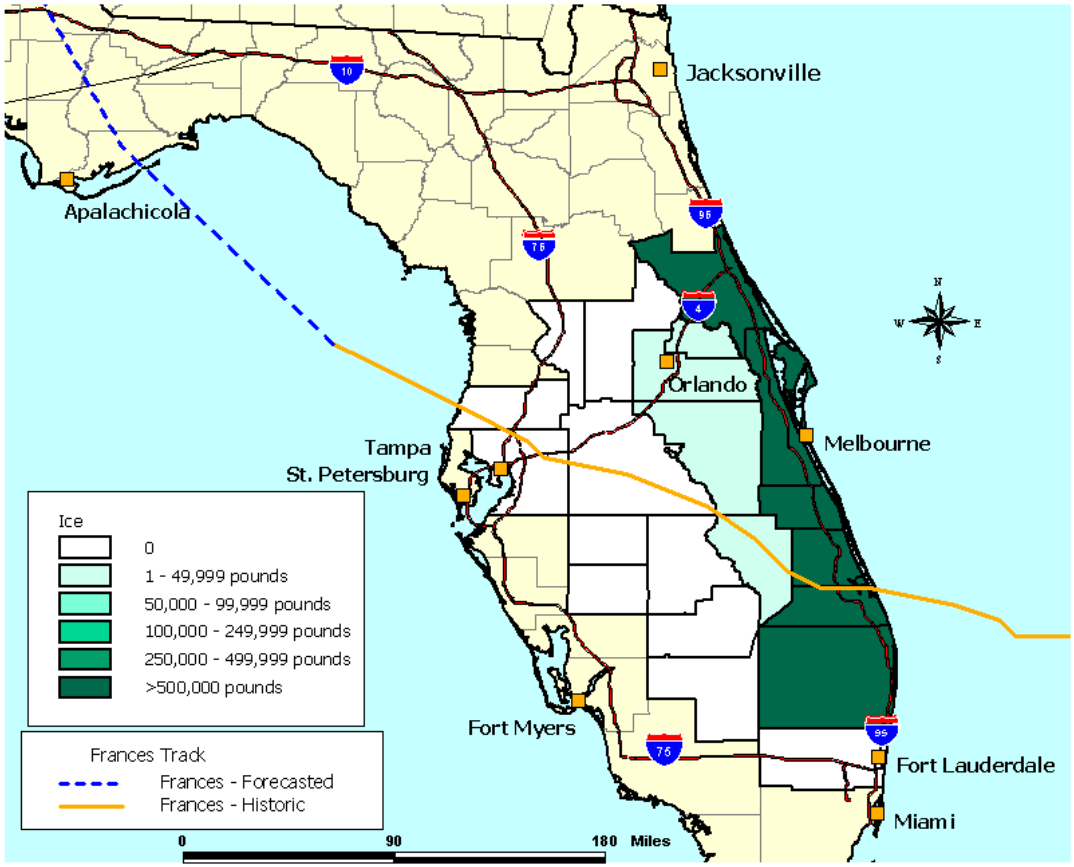
Hurricane Frances Ice Model

Landfall Plus About **24** Hours

For Official Use Only!



Most Probable Landfall Ice Model Results

Florida – 3,294,000 pounds

Model results per county on following page

This hurricane scenario is based on a Category 2 storm making landfall in near proximity to Stuart, FL

Information provided on this page displays the most probable hurricane track based on information from the National Hurricane Center (NHC). These projections are based on information from the NHC ***(0500 EDT 09/06/2004)*** forecast. The intensity of this hurricane has been altered to complete model runs.

The amount of ice forecasted is based on Mission Guide Book requirements (8 pounds per day per person) and Ice SME input and represents a first day daily need.
